Fusion360 post-processor

Many people use Fusion360 for both CAD and CAM.

To make your user experience easier, we have included the latest Mach4 postprocessor for Fusion360 CAM. To use this, copy the "mach4mil.cps" file to the following file location on your computer

    C:\Users\(USER NAME)\AppData\Roaming\Autodesk\Fusion 360 CAM\Posts

Where "(USER NAME)" is the account name you used to log into your computer.

Then when you are using Fusion360, you select this post-processor prior to generating the .nc or .tap program files.
